---

PROFESSIONAL SUMMARY

Computer Science and Engineering student at Daffodil International University focused on building modern web applications, AI automation pipelines, and ESP32 IoT systems for real-world impact.

SELECTED PROJECTS

1. ShopixxoBD - Multi-Vendor E-Commerce Platform [Next.js, Node.js, MongoDB, Stripe]
Multi-vendor e-commerce platform for Bangladesh with integrated vendor management and delivery system.

2. TradingSpark - AI Trading Strategy & Backtesting [Python, FastAPI, AI, Backtesting]
AI-powered trading strategy generation and historical performance backtesting system.

3. Tender Package Builder - Bilingual PDF Automation [Next.js, PDF, AI, OpenAI]
AI tool to create professional tender PDF packages in Bengali and English.

4. IoT Energy Monitor - Smart Power Analytics [ESP32, IoT, Data Visualization, React]
Smart energy monitoring system using ESP32 microcontrollers and real-time analytics dashboards.

EXPERIENCE & EDUCATION

2023 - Present | CSE Student - Daffodil International University
Focused on software engineering, AI, IoT and real-world system architecture.

2022 - Present | Freelance & Independent Developer
Building web apps, automation tools and custom digital solutions for local and international clients.

2021 - Present | Research & Personal Projects
IoT systems, AI tools, Banglish compiler and workflow automation projects.

TECHNICAL TOOLKIT & RESEARCH INTERESTS

Skills: TypeScript, JavaScript, Python, React, Next.js, Node.js, Laravel, PHP, MongoDB, MySQL, ESP32, Git

Research: NILM for Appliance Monitoring, Smart Agricultural Systems, Computer Vision Applications
